

# Save water by planting natives!

Did you know that on Maui, about 25%-60% of the typical home owner's water bill is spent on outside water uses? You can save water and money by planting native trees and shrubs that are adapted to the climate in which you live.

Think globally, act locally!

These plants adapt well to the wet and warm climatic zone on Maui. For a complete list of native plants by climatic zone, contact the Dept. of Water Supply at 270-7199.

All along the coast of Maui

## Windward Coastal Salt Spray Zones

zone 5

These areas are close to the ocean so plants must be tolerant to salt spray. Plants that have evolved here tend to be low to the ground due to constant wind.

Bring this flyer to participating nurseries to get a discount on native plants or entrance fees to native gardens. See the back side for details.

### 'ŪLEI

The lacy subdivided leaves of this ground cover plant gives it a fern-like appearance.

### PŌHINAHINA

A drought tolerant and hardy shrub with velvety silvery leaves.

### 'ILIMA

A great ground cover plant. Traditionally, 'ilima flowers were made into royal lei.

### LOULU

Fan palm that grows to 15'-40'. Traditionally used to thatch roofs.

### 'ĀNAPANAPA

The leaves from this 3'-10' shrub were traditionally crushed to make soap.

### BEACH NAUPAKA

A popular salt tolerant shrub that sports a unique "half" flower.

## Don't plant...

**FOUNTAIN GRASS.** This bunchgrass from Africa fuels wildfires. It has cylindrical leaves and grows in a dense clump up to 3 feet tall. The flowers are purple when young and white when dry.

**IRONWOOD.** This salt-resistant tree from Australia spreads from plantings and displaces native coastal vegetation. It has a wispy pine-like appearance and can grow up to 100 feet tall. The cones are small, and leaves look like pine needles.

For a complete list of the worst horticultural plants in Hawai'i, visit the Department of Land and Natural Resources website at <http://www.state.hi.us/dlnr/dofaw/hortweeds/specieslist.htm>.

# Turn your garden into a Native Plant Haven!

You can start by visiting some of these places to get ideas about how to landscape your home or business.

And remember kids...  
make sure there are  
no coqui frogs on the  
plants you buy!

**T**he following places sell and/or display native Hawaiian plants. Some of the nurseries propagate native Hawaiian plants from seeds and/or cuttings for the purpose of protecting and preserving these native plants. Please call them before going to view the sites. They can provide valuable information and referral to other sources!
